CABIOS **SUBJECT INDEX**

Vol. 13 no. 6 1997
Pages 629-631

BDS-Map
building large scale genetic maps 497
BioWish
Tcl/Tk command extension 621
BLAST
graphic workbench, Microsoft Windows 95/NT 407
results post-processing, CBLAST, clustered sequences 81
CBLAST
BLAST results post-processing, clustered sequences 81
Chromatin
fibre, folding, Brownian dynamics model 271
Compression algorithm
dosDNA 131
Computational linguistics
application to biological sequences 333
ConInspector 3.0
nucleic acid sequence scanning 109
Conserved patterns
analysis, pattern graph, Pratt program 509
Contig building
FPC, restriction fingerprinted clones 523
Data representation
protein, optimized data decomposition 487
Database
BLAST file viewing, MacBOB 623
deductive system, PACADE, protein structure analysis 183
EMBL, Seqalert, daily alertness server 545
FASTA file viewing, MacBOB 623
HCDSearch, TIGR 201
hexanucleotide frequency 107
Micado, microbial genomes, network-oriented 431
navigation, CySPID 281
nucleotide, compression, fast searching 549
Sequence Alerting Server 619
SWISSPROT, Seqalert, daily alertness server 545
Daylight
calculation of, algorithm 479
DCA
sequence alignment, simultaneous, multiple, divide-and-conquer approach 625
DISTREE
genetic distance measurement, aligned DNA 445
Disulfide mapping
mass spectrometric, analysis, software tool 617
DNA alignment
similar sequences, *Sim* 375
DNA binding genes
latent periodicity 37
DNA sequencing
DNA-SPECTRUM, SBH 205
DNA sequencing
Hopper, automating data tracking 175
new method 151
DNA
large fragment sizing 485
DNA-SPECTRUM
DNA sequencing, SBH 205
DnaSP 2.0
molecular population genetics analysis 307
dosDNA
compression algorithm 131
Drosophila
transposable element insertions, localization, DROSOPOSON 61
DROSOPOSON
transposable element insertions, localization, *Drosophila* 61
DSC
protein, secondary structure prediction 473
EMBL
sequence submission system, interactive data collection, WWW 55
End-Epi
phylogenetic dynamical process inferral 303
Enzyme
REFERASS, steady-state equation derivation 159
Equilibrium constants
estimation, automated group contribution methods 537
EST_GENOME
spliced DNA sequence alignment 477
ESTblast
expressed sequence tags, assembly 453
Evolution
distance trees, construction, nucleotide sequences, TREECON 227
Seq-Gen, DNA, Monte Carlo simulation, phylogenetic trees 235
Expressed sequence tags
assembly, ESTblast 453
FASTA
graphic workbench, Microsoft Windows 95/NT 407
Fourier analysis
probable gene prediction, GeneScan 263
FPC
contig building, restriction fingerprinted clones 523
Freshwater invertebrate identification
key, fuzzy logic 169
Gene mapping
gRanch, software tool 323
Genotyping
Grouper, marker set creation, multiplexed 239
gRanch
gene mapping, software tool 323
Grouper
marker set creation, multiplexed genotyping 239
GSC
NMR, chemical shift comparison 557
HCDSearch
TIGR 201
Hexanucleotide frequency
database 107
Hidden Markov model
MetaMEME, protein 397
Hill equation
reversible, metabolic models 377
Hopper
automating data tracking, DNA sequencing 175
Image analysis
2D gel electrophoretogram, object-oriented 257
JaMBW 1.1
molecular biologists' workbench 475
LASSAP
large scale sequence comparison 137
Latent periodicity
oncogenes, DNA binding genes 37
MacBOB
BLAST file viewing 623
FASTA file viewing 623
MACS
automatic object counting, shape recognition 563
Mapdiff
gap difference determination, genomic 217
Mapping
BDS-Map, building large scale genetic maps 497
Match-Box_server
sequence alignment, protein 249

© Oxford University Press

Metabolic control analysis
novel algorithm 123
MetaMEME
hidden Markov model, protein 397
Methanococcus jannaschii
genome sequence analysis, protein function prediction 481
MHC Class II
quantitative perdictive model, algorithm 211
Micado
database, microbial genomes, network-oriented 431
Monte Carlo simulation
PSeq-Gen, protein sequence, evolution 559
Seq-Gen, DNA, sequence evolution, phylogenetic trees 235
mRNA
eukaryotic, splice site identification, start site identification 365
precursor, 3'-processing site, recognition, human, POLYAH 23
NMR
GSC, chemical shift comparison 557
Nucleic acid sequence scanning
ConInspector 3.0 109
Nucleotide
database, compression, fast searching 549
OLIGO
protein complex formation, analysis 439
Oncogenes
latent periodicity 37
ONIX
protein structure, examination, PDB 111
P-SEA
protein secondary structure, Cα trace 291
PACADE
database, deductive system, protein structure analysis 183
PAML
phylogenetic analysis, maximum likelihood method 555
PCR
competitive, mathematical basis, gene expression quantification 587
Pol II promoter
prediction, PromFD 1.0 29
Poliovirus
RNA, secondary structure, 5'-non-coding region, computer prediction, genetic algorithm 1
POLYAH
mRNA, precursor, 3'-processing site, recognition, human 23
Programs
DCA, sequence alignment, simultaneous, multiple, divide-and-conquer approach 625
BDS-Map, building large scale genetic maps 497
BioWish, Tcl/Tk command extension 621
BLAST, graphic workbench, Microdoft Windows 95/NT 407
CBLAST, BLAST results post-processing, clustered sequences 81
ConInspector 3.0, nucleic acid sequence scanning 109
CySPID, database, navigation 281
DISTREE, genetic distance measurement, aligned DNA 445
DNA-SPECTRUM, DNA sequencing, SBH 205
DnaSP 2.0, molecular population genetics analysis 307
double dynamic programming algorithm, structural alignmen t387
DROSOPOSON, transposable element insertions, localization, *Drosophila* 61
DSC, protein, secondary structure prediction 473
End-Epi, phylogenetic dynamical process inferral 303
EST_GENOME, spliced DNA sequence alignment 477
expressed sequence tags, assembly, ESTblast 453
FASTA, graphic workbench, Microdoft Windows 95/NT 407
FPC, contig building, restriction fingerprinted clones 523
GeneScan, Fourier analysis, probable gene prediction 263
gRanch, gene mapping 323
Grouper, marker set creation, multiplexed genotyping 239
GSC, NMR, chemical shift comparison 557
HCDSearch 201
Hopper, automating data tracking, DNA sequencing 175
JaMBW 1.1, molecular biologists' workbench 475
LASSAP, large scale sequence comparison 137
MACS, automatic object counting, shape recognition 563
Mapdiff, gap difference determination, genomic 217
Match-Box_server, sequence alignment, protein 249
MetaMEME, hidden Markov model, protein 397
OLIGO, protein complex formation, analysis 439
ONIX, protein structure, examination, PDB 111
P-SEA, protein secondary structure, Cα trace 291
PACADE, protein structure analysis 183
PAML, phylogenetic analysis, maximum likelihood method 555
POLYAH, mRNA, precursor, 3'-processing site, recognition, human 23
Pratt, Conserved patterns, analysis, pattern graph 509
PromFD 1.0, eukaryotic pol II promoter prediction 29
ProMSED, multiple sequence editor, protein 243
PSeq-Gen, Monte Carlo simulation, protein sequence, evolution 559
REFERASS, steady-state equation derivation, enzyme 159
SAMBA, biological sequence comaprison 609
Seq-Gen, DNA, sequence evolution, Monte Carlo simulation, phylogenetic trees 235
Seqalert, daily alertness server, EMBL, SWISSPROT 545
SEQSEE, platform-independent graphical user interface 561
Sim3, DNA alignment, similar sequences 75
SS3D-P2, 3-D substructure search, protein motifs, secondary structure basis 593
TREECON, evolutionary distance trees, construction, nucleotide sequences 227
XALIGN, platform-independent graphical user interface 561
XDOM, domain arrangement analysis, protein sequences 601
PromFD 1.0
eukaryotic pol II promoter prediction 29
ProMSED
multiple sequence editor, protein 243
Protein motifs
programs, SS3D-P2, 3-D substructure search 593
Protein sequence
evolution, Monte Carlo simulation, PSeq-Gen 559
identification, distantly related 325
dtabase, Sequence Alerting Server 619
XDOM, domain arrangement analysis 601
Protein structure
examination, ONIX, PDB 111
OLIGO, complex formation, analysis 439
prediction 345
prediction, 3D-1D compatability algorithm 415
prediction, graphical interface 319
quality assessment, Ramachandran plot 425
secondary, definition, long-range interactions 297
secondary, P-SEA, Cα trace 291
Protein
data representation, optimized data decomposition 487
family patterns, rapid indentification tool 115
function prediction, *Methanococcus jannaschii* 481
Match-Box_server, sequence alignment 249
secondary structure prediction, DSC 473
sequence data correlatation, polymorphic, alignment, algorithm 13
sequence, ProMSD 243
Pseudoknots
H-type, RNA, prediction, parallel genetic algorithm 459
Q-RT-PCR
gene expression, measurement, data analysis software 587
Ramachandran plot
protein structure, quality assessment 425

REFERASS
steady-state equation derivation, enzyme 159
RNA alignment
stucture logos, information contents display 583
RNA
pseudoknots, H-type, prediction, parallel genetic algorithm 459
secondary structure, poliovirus, 5'-non-coding region, computer prediction, genetic algorithm 1
SAM hidden Markov modelling
scoring 191
sequence alignment, reduced space 45
SAMBA
biological sequence comaprison 609
Secondary structure
protein, definition, long-range interactions 297
protein, P-SEA, Cα trace 291
protein, prediction, 3D-1D compatability algorithm 415
RNA, computer prediction, poliovirus, 5'-non-coding region, genetic algorithm 1
Seq-Gen
DNA, sequence evolution, Monte Carlo simulation, phylogenetic trees 235
Seqalert
daily alertness server, EMBL, SWISSPROT 545
SEQSEE
platform-independent graphical user interface 561
Sequence alignment
DCA, simultaneous, multiple, divide-and-conquer approach 625
DISTREE, genetic distance measurement, aligned DNA 445
multiple molecular, genetic algorithm 565
reduced space, SAM hidden Markov modelling 45
region index, conservation, variability 313
Sim3, DNA alignment, similar sequences 75
large scale, LASSAP 137
Sequence comparison
video-oriented instructions 145
Sequence data correlatation
protein, polymorphic, alignment, algorithm 13
Sim3
DNA alignment, similar sequences 75
SS3D-P2
3-D substructure search, protein motifs, secondary structure basis 593
Structural alignment
double dynamic programming algorithm 387
Structure
RNA alignment, stucture logos, information contents display 583
Surface active peptides
detection algorithm 99
Transcription control elements
analysis, software availability 89
TREECON
evolutionary distance trees, construction, nucleotide s equences 227
WWW
EMBL, sequence submission system, interactive data collection 55
Micado, database, microbial genomes 431
XALIGN
platform-independent graphical user interface 561
XDOM
domain arrangement analysis, protein sequences 601
